Profile

Motivated Software Engineering student seeking a Web Developer internship. Bringing a solid foundation in front-end and back-end technologies, along with a proven ability to complete projects from conception to deployment. Looking to contribute to a dynamic team and grow as a professional developer.

Education

Ton Duc Thang University

09/2022 – 09/2026

Bachelor of Engineering in Software Engineering

Ho Chi Minh City,
Viet Nam

- Maintained a GPA of 7.8/10 while gaining a strong foundation in core subjects like Data Structures & Algorithms, Web Development, and Database Systems.
- Completed a Web Development course project to build "BrickShop", an e-commerce website. Successfully applied Node.js, Express.js, and MySQL to implement CRUD functionalities, order management, and user authentication.

Awards

Consolation Prize, Class Website Design Competition 2023

04/2023

Faculty of Information Technology, Ton Duc Thang University

- Achieved prize in a university-wide competition with over 20 participating teams, as part of the "Youth Pioneering Digital Transformation" initiative.
- Developed a class website on WordPress, contributing to UI/UX design and theme customization.
- Demonstrated strong teamwork, creativity, and practical application of web development skills.

English

Projects

Omacha Shop - Full-Stack E-commerce Platform (Team Project)

01/2024 – 05/2024

PHP, MySQL, HTML5, CSS3, JavaScript

- Collaborated within a team to build a complete e-commerce website for toys, from database design to deployment.
- Developed key back-end features using PHP and MySQL, including product management, user authentication, and order processing.
- Contributed to creating a responsive and interactive user interface with HTML, CSS, and JavaScript.
- Utilized Git/GitHub for version control and effective team collaboration.

BrickShop - Full-Stack E-commerce Website (Team Project)

09/2024 – 12/2024

Node.js, Express.js, MySQL, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS

- Developed a complete e-commerce platform featuring product management, user authentication, and a secure checkout process.
- Built the backend with **Node.js/Express.js** and designed the database schema in **MySQL**.
- Created a responsive user-facing interface with **Bootstrap** and a separate admin dashboard with **Tailwind CSS**.
- **Link to Project** [↗](#)

ANIME.TV - Anime & Manga Streaming Platform (Personal Project)

04/2025 – 07/2025

HTML5, CSS3, JavaScript (ES6+), GitHub Pages

- Independently designed and developed a static website inspired by Crunchyroll, featuring a custom video player, image galleries, and a manga reader.
- Implemented dynamic content filtering and search functionalities purely with client-side JavaScript.
- Focused on creating a responsive, mobile-first UI/UX to ensure a seamless experience across all devices.
